## ABSTRACT

SkillHub is an innovative digital platform designed to democratize education by allowing anyone in this world to learn and teach for free. By using the concept of barter system, it enables both parties to exchange their knowledge or skills freely and offer a global cycle of peer to peer learning.

The primary objective is to break the barriers of cost, geography, and privilege that exist in the education sector while fulfilling the United Nations' Sustainable Development Goals 4 ( Quality Education). Beyond that, Skilhub also contributes to SDG 10 (reducing inequalities) and SDG 17 (partnership for the goals).

The novelty of Skillhub lies in peer-to-peer knowledge sharing, where every individual wears the role of learner and teacher. Unlike the conventional platforms that rely on video learning by paid instructors. Beside that, Skillhub offers a diversity of skills whether its academic,creative,cultural, vocational and life skills making it differ from most platforms.

Skillhub is passionate to break down barriers to education, giving underserved communities equal opportunities to learn and share skills. Millions can gain access to lifelong learning opportunities aligned with UN SDG 4. Skillhub unites nations and its people as every interaction on Skillhub creates a deep connection between two people.

The platform's sustainability is ensured through certification revenue, institutional partnership with universities, NGOs and Government , creating a scalable model for global impact.

In summary, Skillhub represents more than an educational platform, it is a movement towards borderless and knowledge driven society.

**Keyword:** Democratize education, Barter System of Knowledge , Equals opportunities for underserved community.

**SGD:** 4 ( Quality Education) , SDG 10 (reducing inequalities) and SDG 17 (partnership for the goals).
